

## Massachusetts Marine Beaches [2018]: Water quality data for public and semi-public beaches

The table below summarizes testing and posting information for each marine beach in Massachusetts. Under the state regulations, marine beaches must test for Enterococci. Most beaches do not have to post after each exceedance, provided that (1) they take an immediate resample and (2) that resample does not exceed the standard. Thus, a beach may have an exceedance but no days posted. Conversely, a beach may have days posted, but no exceedances, if it was posted for a reason other than a bacterial exceedance (e.g. rainfall, a cyanobacterial harmful algae bloom, or another hazard such as limited visibility due to poor water clarity).

Community	Beach Name	Sample Location	Testing Frequency	Tests	Single Sample Exceedances	Minimum Exceedance (cfu/100mL)	Maximum Exceedance (cfu/100mL)	Days Posted
Aquinnah	Lobsterville	Sampling Point	Monthly	4
